-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4, 8, 9, 10, 11, 12, 14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Carter 3,314,634.

Regarding claim 4, see Figure 6 of Carter. Regarding claim 10, the "wall" is not being claimed, and whether or not it is fabric is of no patentable weight.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Carter '634 in view of Sinkiewicz '004.

Art Unit: 3634

It would have been obvious that the magnet and the magnetically attractive material of Carter could be reversed, especially in view of the teachings of Fig. 11 of Sinkiewicz.

5. Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carter '634.

It would have been obvious that each side of the storage panel of Carter could be equipped with a first magnetic component. The number of panels is a matter of choice. Note, that panel 34 is rotatable on base 32, at hinge 42.

6. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Carter in view of Pichler '686.

It would have been obvious that a more modern "self-inking" stamp could have been used by Carter, such as is shown in Pichler '686.

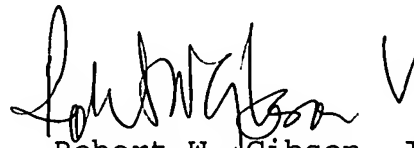

7. The patents to Carter '734, McPherson, Miller, Bostick, Kushner, Erickson, Lookholder, Huffman, Knox, and Radek are cited to show similar structures.
